**Gold Shimmer**

**Yellow Sparkle**  
(topping)

**Red Glitter**  
(topping)

**Glow in the Dark**  
(topping)

**\*NOTE:** These color swatches may appear different from monitor to monitor and should only be used as a general guideline. Consult your Pantone books for a more accurate swatch. All Pantones listed above are approximations. All ink colors will vary based on color & type of material being printed and whether or not an underbase is present. "Yellow Sparkle", "Red Glitter", and "Glow in the Dark" are toppings, rather than ink colors. The base of these colors is a clear gel. To use these inks correctly, they should be printed on top of another ink color. For example: If printing on white or light shirts, it would be a 2 color job - red ink, such as Drake Red, and Red Glitter. If printing on a dark color or black shirt, it would be a 3 color job - White Underbase, red ink, and Red Glitter. Yellow Sparkle and Glow in the Dark are more effective on lighter solid ink colors.
