1. VINYL COLOR NAME - Color can vary by manufacture batch.

2. PART # - This is for HSP stock keeping purposes and can be ignored.

3. PANTONE # - This is the closest possible Pantone match determined by our vinyl manufacturer and do not reflex the opinions of HSP employees.

4. INK CHART COLOR - This is the closest possible match to HSP's in-house stock ink colors, when applicable. These were determined by HSP, but are merely suggestions to help avoid Pantone matching for screen print portions of a job. The suggestions are "within ballpark" and are not an exact match.

\* Cannot be layered beneath another product. This means that if you want two-color personalization, these cannot be your bottom (outline) color.

\*\* These colors have a higher cost than indicated in our pricing guide.
